MATTEO DE MOOR
JUNIOR DATA ENGINEER

CONTACT

- ✉ matteo.de.moor@skynet.be
- 📍 Aalst, Belgium
- 🌐 github.com/MatteoDeMoor
- 🌐 linkedin.com/in/matteo-de-moor

SKILLS

- Python
- SQL
- Data Pipelines
- ETL Development
- Pandas / Polars
- PySpark
- Data Analysis
- Machine Learning
- Deep Learning
- Microsoft Power BI
- Microsoft Fabric
- Microsoft Azure
- Git
- Docker
- Azure DevOps

LANGUAGES

- Dutch (Native)
- English (Fluent)
- French (Basic)

PROFILE

Data Engineer with hands-on experience designing scalable data pipelines, machine learning models, and analytical dashboards. Currently working with Microsoft Fabric, Python, and Power BI to deliver production-ready data solutions and actionable insights.

WORK EXPERIENCE

Agoria — Sep 2025 - Present
Junior Data Engineer

- Build and optimize scalable data pipelines using Microsoft Fabric
- Model datasets and optimize analytical performance
- Develop Power BI dashboards for decision-making insights
- Automate data workflows and integrate multiple data sources
- Improve data quality for reporting systems

Multiminds — Aug 2025 - Sep 2025
Intern as Data Engineer

- Contributed to development of an AI chatbot PoC
- Generated training data and optimized NLP responses
- Worked with Python, Azure Functions, and vector databases
- Collaborated with AI and data engineering teams

Club Brugge — Feb 2025 - May 2025
Intern as Data Scientist

- Analyzed StatsBomb event data using Python, Pandas, and Polars
- Built dashboards and visual analytics tools (Plotly Dash)
- Developed Squad Stability dashboard via API integration
- Collaborated with innovation team on performance analytics

EDUCATION

Bachelor AI & Data Engineering — 2022-2025
HoGent
Thesis: Transformer-based deep learning model predicting football match outcomes with optimized performance vs baseline architectures.

Sciences & Mathematics — 2016 - 2022
DVM Humaniora
